

ANTHONY ROSSMAN

FULL-STACK SOFTWARE ENGINEER | C#.NET, TYPESCRIPT & VUE

Boise, ID | 208-869-3615 | anthony.rossman.dev@gmail.com

Portfolio | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-stack developer with more than one year of freelance experience building and supporting client software across Vue/Nuxt interfaces, C#/ASP.NET Core APIs, SQL data, authentication, and third-party services. Strongest in C#.NET, TypeScript, Vue 3, and MySQL, with hands-on Node.js, Docker, Linux, and AWS deployment experience. Built an authenticated ~300-product commerce platform and an accessibility-first component library with 1,000+ npm downloads. Known for thorough documentation, careful testing, clear client communication, and learning unfamiliar tools quickly enough to deliver complete working solutions.

TECHNICAL SKILLS

Primary Stack: C#, ASP.NET Core, Entity Framework Core, TypeScript, JavaScript, Vue 3, Nuxt, SQL, MySQL

Frontend: HTML5, CSS3/SCSS, Tailwind CSS, Bootstrap, GSAP, responsive UI development, web accessibility

Backend & Architecture: REST/JSON APIs, Node.js, OOP, MVC, DTO modeling, layered services, validation, authentication, role-based authorization

Data, Integrations & Quality: MySQL, MongoDB, Stripe, Algolia, Resend, Cloudinary, Auth0, Vitest, Postman, Swagger/OpenAPI

Delivery & Tooling: Git/GitHub, Docker, Linux/Bash, AWS EC2, VPS deployment, Claude Code, ChatGPT, MCP server exposure, debugging, technical documentation

EXPERIENCE

Freelance Full-Stack Developer | Self-Employed

Dec 2024 - Present

- Build and support full-stack applications for three paying clients across custom e-commerce, headless Vue/WordPress, and Gutenberg websites.
- Develop responsive Vue/Nuxt interfaces, ASP.NET Core REST APIs, MySQL data layers, authentication, third-party integrations, and administrative tools; test endpoints and document APIs and system behavior.
- Maintain two production WordPress websites through weekly content updates, bug fixes, feature enhancements, and direct client communication.

Full-Stack Developer Intern | Boise CodeWorks

May 2025

- Completed intensive project-based training in JavaScript, Vue, C#, .NET, REST APIs, and SQL while building and presenting individual and team applications.

Legal Assistant | Rossman Law Group, PLLC

Aug 2019 - May 2025

- Created structured 10-15 question intake criteria and evaluated 10+ prospective cases daily, substantially reducing the volume of unqualified matters requiring attorney review.
- Managed confidential client data, documentation, deadlines, and workflows for three attorneys; communicated complex information clearly across clients, attorneys, medical providers, and vendors.

SELECTED SOFTWARE PROJECTS

Antique Store E-commerce Platform | C#.NET, TypeScript, Vue, MySQL

Client Project

- Built a ~300-product system with a Nuxt storefront, Vue administrative dashboard, ASP.NET Core REST API, Entity Framework Core, and a MySQL relational data model; secured access with two Auth0 roles.
- Integrated Stripe, Algolia, Resend, Cloudinary, and Auth0 and implemented a four-stage reservation-to-fulfillment workflow with seven automated email events.
- Designed DTO-based request/response models, reusable services, and validation; documented APIs with XML comments and Swagger/OpenAPI and tested endpoints, authentication, and failure cases in Postman.

Shoehorn UI | TypeScript, Vue 3, Vitest

Open Source

- Developed and documented 16 accessibility-first components with 16 Vitest suites covering behavior, errors, keyboard interaction, focus management, ARIA relationships, and development-time misuse warnings.
- Published seven versioned releases and earned 1,000+ npm downloads in the package's first four months.

FS_Templater | TypeScript, Node.js & Developer Tooling

In Development

- Built configurable project scaffolds with selectable Vue, Nuxt or SPA rendering, Node.js or ASP.NET Core backends, Auth0, and MySQL or MongoDB options.

EDUCATION

Full-Stack Software Development Certificate | Boise CodeWorks

May 2025
